EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech., CSE	National Institute of Technology, Warangal	8.64	[April 2026]
Senior Secondary	Sri Chaitanya Junior College	98.3	[Mar 2024]
Secondary	Narayana School	9.8	[May 2022]

PROJECTS

- **ML Driven: Code smell Detection Compiler** January 2026 - April 2026
Tools: Python, Scikit-learn, Random Forest, AST, Joblib, Pandas, NumPy 
 - Developed an ML-driven static analysis system for automated code smell detection.
 - Built an AST-based feature extraction pipeline for machine learning-based code analysis.
 - Trained a Random Forest classifier to identify common code smells in Python programs.
 - Automated code feature extraction and prediction to support software quality improvement.
- **StudyTracker: Exam Preparation and Progress Tracker** June 2026
Tools: React (Vite), TypeScript, HTML, CSS, SVG, Local Storage 
 - Designed a React-based study analytics dashboard to track exam schedules, syllabus progress, and daily study activities.
 - Integrated SVG-based visualizations to display syllabus completion, study consistency, and subject-wise progress.
 - Analyzed study data to provide insights into preparation trends and time management.
 - Improved dashboard usability through iterative testing.
- **TruthLens: A Fake review Detector(Team Project)** January 2026 - April 2026
Tools: Python,Flask,Scikit-learn,NLTK,TF-IDF,OCR(Tesseract),Random forrest,HTML,CSS,Javascript 
 - Collaborated in a 2-member team to develop an AI-powered review authenticity detection system using Machine Learning, NLP, and OCR.
 - Implemented TF-IDF feature extraction, NLTK-based preprocessing, and a Random Forest classifier for review classification.
 - Integrated Tesseract OCR to extract text from review screenshots for multi-modal analysis.
 - Developed a Flask-based web application for review submission and real-time authenticity prediction.

SKILLS

- **Programming Languages**: C,C++,Python,Java,R
- **Web Technologies**: HTML,CSS,Javascript,SVG,Flask
- **Data Analysis**: Pandas,NumPy,Matplotlib,SQL
- **FrameWorks**: React.js
- **Machine Learning**: Scikit-learn
- **Tools Platforms**: VsCode,Git,Jupyter Notebook
- **Soft Skills**: Problem-solving,Team collaboration,Time Management

CERTIFICATIONS

- **Cognitive Class, Python for Data Science** June 2026
